

Quick Reference

Start

After booting the system press -A to start the announcement system.

Select the configuration that matches the schedule for the day. If nothing matches, contact an expert so we can make a new schedule.

Click **Play**.

Run time Controls

While running the following controls are available. Be sure to press <enter> after each command to execute it.

p Pause system. If in the middle of an announcement, the pause will occur after the announcement. Press <enter> to continue.

v<number> Set the background volume to <number> percentage of maximum volume. This applies to background only. Foreground (announcements) will always be played at 100%. To adjust the foreground volume, turn the knob on the amplifier.

v+<number>

v-<number> Increase or decrease the volume by the indicated number.

s Suspend. Stop all scheduled announcements. This is for when the schedule gets so screwed up the scheduled announcements are meaningless.

r Resume. Resume all scheduled announcements.

q Quit. (Not really necessary, just shutdown the computer)

Shutting down the system

Press -X to display the shutdown menu. Click "Power Off"
